

INTRODUCTION

The idea of the project is to predict the dropout risk of students using academic, personal, and behavioral factors and provide proper counseling recommendations to reduce their dropout possibility. The system analyzes student performance data and predicts whether the student is at **low, medium, or high risk** and then provides **personalized guidance or counseling suggestions**.

OBJECTIVES

- Predict student dropout risk using academic and behavioral data.
- Categorize students as Low, Medium, or High risk.
- Provide personalized counseling recommendations.
- Help institutions reduce dropout rates.

PLANNING OF WORK

Step 1 ●

Problem
Identification

Step 2 ●

FUTURE SCOPE

- Integrate real-time college database.
- Use advanced ML models for improved accuracy.
- Expand counseling to mental health and career planning.
- Develop mobile app version.
